

LUXULYAN NEIGHBOURHOOD DEVELOPMENT PLAN 2016/17

Key points from what you told us in July 2016

1. 38 people responded (2.6% of the parish).
2. Out of the responses, most interest concerned environmental or open spaces issues etc.
3. This was followed by housing issues, e.g. housing numbers, affordable houses etc.
4. Of less interest were business and employment.
5. Many of the issues raised will be covered in the plan; however, priority has to be given to housing and infrastructure in order to comply with Government and Cornwall Council policies.
6. The next questionnaire will focus on the issues that Neighbourhood Plans are designed to address.
7. The need to demonstrate that the Neighbourhood Plan is important in moving towards plan-led, rather than speculative, development, (as some of the concerns indicated).
